Note that this report is not the "Certificate of Analysis". This report only lists the target analytes that displayed concentrations that exceeded the detection limit specified for that analyte. For a complete listing of all analytes requested and the results of the analysis see the " Certificate of Analysis".

Final Report

Laboratory Order ID 17D0225

Client Name: Joyce Engineering, Inc.-Richmond
1604 Ownby Lane
Richmond, VA 23220

Date Received: April 6, 2017 16:03
Date Issued: April 20, 2017 14:50
Project Number: 310.1701.03.01
Purchase Order:

Submitted To: Jake White

Client Site I.D.: Laurel Valley Center Sanitary Landfill

Enclosed are the results of analyses for samples received by the laboratory on 04/06/2017 16:03. If you have any questions concerning this report, please feel free to contact the laboratory.

Sincerely,

Ted Soyars
Laboratory Manager

End Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as received by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfite that are performed in the laboratory do not meet NELAC requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the Sampler included in the Certificate of Analysis are done so at the client's request and are not included in the laboratory's fields of certification nor have they been audited for adherence to a reference method or procedure.

The signature on the final report certifies that these results conform to all applicable NELAC standards unless otherwise specified. For a complete list of the Laboratory's NELAC certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Qualifiers and Definitions

- C Continuing calibration verification response for this analyte is outside specifications.
- Cl Residual Chlorine or other oxidizing agent was detected in the container used to analyze this sample.
- E Estimated concentration, outside calibration range
- J The reported result is an estimated value.
- L LCS recovery is outside of established acceptance limits
- M Matrix spike recovery is outside established acceptance limits
- P Duplicate analysis does not meet the acceptance criteria for precision
- S Surrogate recovery was outside acceptance criteria
- RPD Relative Percent Difference
- Qual Qualifiers
- RE Denotes sample was re-analyzed
- LOD Limit of Detection
- BLOD Below Limit of Detection
- LOQ Limit of Quantitation
- DF Dilution Factor
- TIC Tentatively Identified Compounds are compounds that are identified by comparing the analyte mass spectral pattern with the NIST spectral library. A TIC spectral match is reported when the pattern is at least 75% consistent with the published pattern. Compound concentrations are estimated and are calculated using an internal standard response factor of 1.
- PCBs, Total Total PCBs are defined as the sum of detected Aroclors 1016, 1221, 1232, 1248, 1254, 1260, 1262, and 1268.

Sample Conditions Checklist

Samples Received at:	5.10°C
How were samples received?	AWS Courier
Were Custody Seals used? If so, were they received intact?	No
Are the custody papers filled out completely and correctly?	Yes
Do all bottle labels agree with custody papers?	Yes
Is the temperature blank or representative sample within acceptable limits? (above freezing to 6°C) or received on ice and recently taken?	Yes
Are all samples within holding time for requested laboratory tests?	Yes
Is a sufficient amount of sample provided to perform the tests included?	Yes
Are all samples in appropriate containers for the analyses requested?	Yes
Were volatile organic containers received?	Yes
Are all volatile organic and TOX containers free of headspace?	Yes
Is a trip blank provided for each VOC sample set? VOC sample sets include EPA8011, EPA504, EPA8260, EPA624, EPA8015 GRO, EPA8021, EPA524, and RSK-175.	Yes
Are all samples received appropriately preserved? Note that metals containers do not require field preservation but lab preservation may delay analysis.	Yes

For Trip Blank see work order 17D0221. JPV 04/07/2017 11:09

Richmond, VA 23220

Date Received: April 6, 2017 16:05
Date Issued: April 20, 2017 14:55
Project Number: 310.1601.03.02
Purchase Order:

Submitted To: Jake White

Client Site I.D.: Laurel Valley Center Sanitary Landfill (Culpeper)

Enclosed are the results of analyses for samples received by the laboratory on 04/06/2017 16:05. If you have any questions concerning this report, please feel free to contact the laboratory.

Sincerely,

Ted Soyars
Laboratory Manager

End Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as received by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfite that are performed in the laboratory do not meet NELAC requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the Sampler included in the Certificate of Analysis are done so at the client's request and are not included in the laboratory's fields of certification nor have they been audited for adherence to a reference method or procedure.

The signature on the final report certifies that these results conform to all applicable NELAC standards unless otherwise specified. For a complete list of the Laboratory's NELAC certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Qualifiers and Definitions

- J The reported result is an estimated value.
- L LCS recovery is outside of established acceptance limits
- M Matrix spike recovery is outside established acceptance limits
- RPD Relative Percent Difference
- Qual Qualifiers
- RE Denotes sample was re-analyzed
- LOD Limit of Detection
- BLOD Below Limit of Detection
- LOQ Limit of Quantitation
- DF Dilution Factor
- TIC Tentatively Identified Compounds are compounds that are identified by comparing the analyte mass spectral pattern with the NIST spectral library. A TIC spectral match is reported when the pattern is at least 75% consistent with the published pattern. Compound concentrations are estimated and are calculated using an internal standard response factor of 1.
- PCBs, Total Total PCBs are defined as the sum of detected Aroclors 1016, 1221, 1232, 1248, 1254, 1260, 1262, and 1268.

Certificate of Analysis

Client Name: Joyce Engineering, Inc.-Richmond
 Client Site I.D.: Laurel Valley Center Sanitary Landfill (Culpeper)
 Submitted To: Jake White

Date Issued: 4/20/2017 2:55:06PM

Sample Conditions Checklist

Samples Received at:	5.10°C
How were samples received?	AWS Courier
Were Custody Seals used? If so, were they received intact?	No
Are the custody papers filled out completely and correctly?	Yes
Do all bottle labels agree with custody papers?	Yes
Is the temperature blank or representative sample within acceptable limits? (above freezing to 6°C) or received on ice and recently taken?	Yes
Are all samples within holding time for requested laboratory tests?	Yes
Is a sufficient amount of sample provided to perform the tests included?	Yes
Are all samples in appropriate containers for the analyses requested?	Yes
Were volatile organic containers received?	Yes
Are all volatile organic and TOX containers free of headspace?	Yes
Is a trip blank provided for each VOC sample set? VOC sample sets include EPA8011, EPA504, EPA8260, EPA624, EPA8015 GRO, EPA8021, EPA524, and RSK-175.	No
Are all samples received appropriately preserved? Note that metals containers do not require field preservation but lab preservation may delay analysis.	Yes

Enclosed are the results of analyses for samples received by the laboratory on 04/06/2017 16:05. If you have any questions concerning this report, please feel free to contact the laboratory.

Sincerely,

Ted Soyars
Laboratory Manager

End Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as received by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfite that are performed in the laboratory do not meet NELAC requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the Sampler included in the Certificate of Analysis are done so at the client's request and are not included in the laboratory's fields of certification nor have they been audited for adherence to a reference method or procedure.

The signature on the final report certifies that these results conform to all applicable NELAC standards unless otherwise specified. For a complete list of the Laboratory's NELAC certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Qualifiers and Definitions

C	Continuing calibration verification response for this analyte is outside specifications.
E	Estimated concentration, outside calibration range
J	The reported result is an estimated value.
L	LCS recovery is outside of established acceptance limits
M	Matrix spike recovery is outside established acceptance limits
P	Duplicate analysis does not meet the acceptance criteria for precision
S	Surrogate recovery was outside acceptance criteria
RPD	Relative Percent Difference
Qual	Qualifiers
-RE	Denotes sample was re-analyzed
LOD	Limit of Detection
BLOD	Below Limit of Detection
LOQ	Limit of Quantitation
DF	Dilution Factor
TIC	Tentatively Identified Compounds are compounds that are identified by comparing the analyte mass spectral pattern with the NIST spectral library. A TIC spectral match is reported when the pattern is at least 75% consistent with the published pattern. Compound concentrations are estimated and are calculated using an internal standard response factor of 1.
PCBs, Total	Total PCBs are defined as the sum of detected Aroclors 1016, 1221, 1232, 1248, 1254, 1260, 1262, and 1268.

Sample Conditions Checklist

Samples Received at:	5.10°C
How were samples received?	AWS Courier
Were Custody Seals used? If so, were they received intact?	No
Are the custody papers filled out completely and correctly?	Yes
Do all bottle labels agree with custody papers?	Yes
Is the temperature blank or representative sample within acceptable limits? (above freezing to 6°C) or received on ice and recently taken?	Yes
Are all samples within holding time for requested laboratory tests?	Yes
Is a sufficient amount of sample provided to perform the tests included?	Yes
Are all samples in appropriate containers for the analyses requested?	Yes
Were volatile organic containers received?	Yes
Are all volatile organic and TOX containers free of headspace?	Yes
Is a trip blank provided for each VOC sample set? VOC sample sets include EPA8011, EPA504, EPA8260, EPA624, EPA8015 GRO, EPA8021, EPA524, and RSK-175.	Yes
Are all samples received appropriately preserved? Note that metals containers do not require field preservation but lab preservation may delay analysis.	Yes

Client Name: Joyce Engineering, Inc.-Richmond
1604 Ownby Lane
Richmond, VA 23220

Date Received: October 4, 2017 14:55
Date Issued: October 17, 2017 14:12
Project Number: 310.1701.03.02 (CA)
Purchase Order:

Submitted To: Jake White

Client Site I.D.: Laurel Valley Center Sanitary Landfill (Culpeper)

Enclosed are the results of analyses for samples received by the laboratory on 10/04/2017 14:55. If you have any questions concerning this report, please feel free to contact the laboratory.

Sincerely,

Ted Soyars
Laboratory Manager

End Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as received by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfite that are performed in the laboratory do not meet NELAC requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the Sampler included in the Certificate of Analysis are done so at the client's request and are not included in the laboratory's fields of certification nor have they been audited for adherence to a reference method or procedure.

The signature on the final report certifies that these results conform to all applicable NELAC standards unless otherwise specified. For a complete list of the Laboratory's NELAC certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Qualifiers and Definitions

- J The reported result is an estimated value.
- L LCS recovery is outside of established acceptance limits
- M Matrix spike recovery is outside established acceptance limits
- P Duplicate analysis does not meet the acceptance criteria for precision
- RPD Relative Percent Difference
- Qual Qualifiers
- RE Denotes sample was re-analyzed
- LOD Limit of Detection
- BLOD Below Limit of Detection
- LOQ Limit of Quantitation
- DF Dilution Factor
- TIC Tentatively Identified Compounds are compounds that are identified by comparing the analyte mass spectral pattern with the NIST spectral library. A TIC spectral match is reported when the pattern is at least 75% consistent with the published pattern. Compound concentrations are estimated and are calculated using an internal standard response factor of 1.
- PCBs, Total Total PCBs are defined as the sum of detected Aroclors 1016, 1221, 1232, 1248, 1254, 1260, 1262, and 1268.

Sample Conditions Checklist

Samples Received at:	2.00°C
How were samples received?	Walk In
Were Custody Seals used? If so, were they received intact?	Yes
Are the custody papers filled out completely and correctly?	Yes
Do all bottle labels agree with custody papers?	Yes
Is the temperature blank or representative sample within acceptable limits? (above freezing to 6°C) or received on ice and recently taken?	Yes
Are all samples within holding time for requested laboratory tests?	Yes
Is a sufficient amount of sample provided to perform the tests included?	Yes
Are all samples in appropriate containers for the analyses requested?	Yes
Were volatile organic containers received?	Yes
Are all volatile organic and TOX containers free of headspace?	Yes
Is a trip blank provided for each VOC sample set? VOC sample sets include EPA8011, EPA504, EPA8260, EPA624, EPA8015 GRO, EPA8021, EPA524, and RSK-175.	No
Are all samples received appropriately preserved? Note that metals containers do not require field preservation but lab preservation may delay analysis.	Yes

Work Order Comments

Sample Delivery Group ID Laurel Valley Comp 171004

Client Name: LaBella Associates, D.P.C.
1604 Ownby Lane
Richmond, VA 23220

Date Issued: 10/29/2020 10:24:44AM

Submitted To: Jake White

Client Site I.D.: Laurel Valley Center Sanitary Landfill (Culpeper)

Purchase Order:

Enclosed are the results of analyses for samples received by the laboratory in sample delivery group Laurel Valley Comp 171004 . Work orders included in the sample delivery group:

<u>Work Order</u>	<u>Receive Date</u>	<u>Project Number</u>
17J0136	10/4/2017 2:55:48PM	310.1701.03.01

Ted Soyars

Technical Director

End Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as received by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfite that are performed in the laboratory do not meet NELAC requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the Sampler included in the Certificate of Analysis are done so at the client's request and are not included in the laboratory's fields of certification nor have they been audited for adherence to a reference method or procedure.

The signature on the final report certifies that these results conform to all applicable NELAC standards unless otherwise specified. For a complete list of the Laboratory's NELAC certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Qualifiers and Definitions

C Continuing calibration verification response for this analyte is outside specifications.

E Estimated concentration, outside calibration range

J The reported result is an estimated value.

L LCS recovery is outside of established acceptance limits

M Matrix spike recovery is outside established acceptance limits

P Duplicate analysis does not meet the acceptance criteria for precision

S Surrogate recovery was outside acceptance criteria

RPD Relative Percent Difference

Qual Qualifiers

-RE Denotes sample was re-analyzed

LOD Limit of Detection

BLOD Below Limit of Detection

LOQ Limit of Quantitation

DF Dilution Factor

TIC Tentatively Identified Compounds are compounds that are identified by comparing the analyte mass spectral pattern with the NIST spectral library. A TIC spectral match is reported when the pattern is at least 75% consistent with the published pattern. Compound concentrations are estimated and are calculated using an internal standard response factor of 1.

PCBs, Total Total PCBs are defined as the sum of detected Aroclors 1016, 1221, 1232, 1248, 1254, 1260, 1262, and 1268.

Sample Conditions Checklist

Samples Received at:	2.00°C
How were samples received?	Walk In
Were Custody Seals used? If so, were they received intact?	No
Are the custody papers filled out completely and correctly?	Yes
Do all bottle labels agree with custody papers?	Yes
Is the temperature blank or representative sample within acceptable limits or received on ice, and recently taken?	Yes
Are all samples within holding time for requested laboratory tests?	Yes
Is a sufficient amount of sample provided to perform the tests included?	Yes
Are all samples in appropriate containers for the analyses requested?	Yes
Were volatile organic containers received?	Yes
Are all volatile organic and TOX containers free of headspace?	Yes
Is a trip blank provided for each VOC sample set? VOC sample sets include EPA8011, EPA504, EPA8260, EPA624, EPA8015 GRO, EPA8021, EPA524, and RSK-175.	Yes
Are all samples received appropriately preserved? Note that metals containers do not require field preservation but lab preservation may delay analysis.	Yes

Work Order Comments

For Trip Blank see 17J0137-03. BAR 10/05/17 0846

See sample memo on file for detects per client request. KLC 10/5/2017 13:32.

Two amber liters were not delivered for sample MW-3A. Client is to resample and submit. KLC 10/6/2017 13:21.

Enclosed are the results of analyses for samples received by the laboratory on 11/14/2017 14:30. If you have any questions concerning this report, please feel free to contact the laboratory.

Sincerely,

Ted Coyne
Laboratory Manager

End Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as required by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfite that are performed in the laboratory do not meet NELAP requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the Sampler included in the Certificate of Analysis are done as at the client's request and are not included in the laboratory's fields of certification nor have they been validated for adherence to a reference method or procedure.

The signature on the final report certifies that these results conform to all applicable NELAP standards unless otherwise specified. For a complete list of the Laboratory's NELAP certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Richmond, VA 23220

Date Issued: 4/19/2018 10:17:55AM

Submitted To: Jake White

Client Site I.D.: Laurel Valley Center Sanitary Landfill (Culpeper)

Purchase Order:

Enclosed are the results of analyses for samples received by the laboratory in sample delivery group Laurel Valley Corr. 180404. Work orders included in the sample delivery group:

Work Order	Receive Date	Project Number
1800112	4/19/2018 4:28:00PM	21800119.00.02

Ted Coyne

Laboratory Manager

Final Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as received by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfate that are performed in the laboratory do not meet NELAP requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the samples returned in the Certificate of Analysis are shown as at the client's request and are not included in the laboratory's field of certification for them. They have not been verified for adherence to a reference method or procedure.

The signature on this final report certifies that these results conform to all applicable NELAP standards unless otherwise specified. For a complete list of the Laboratory's NELAP certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Client Name: LaBella Associates, D.P.C.
Client Site I.D.: Laurel Valley Center Sanitary Landfill (Culpeper)
Submitted To: Jake White

Date Issued: 4/19/2018 10:17:55AM

Qualifiers and Definitions

- J The reported result is an estimated value.
- L LCS recovery is outside of established acceptance limits
- M Matrix spike recovery is outside established acceptance limits

- RPD Relative Percent Difference
- Qual Qualifiers
- RE Denotes sample was re-analyzed
- LOD Limit of Detection
- BL00 Below Limit of Detection
- LOQ Limit of Quantitation
- DF Dilution Factor
- TIC Tentatively Identified Compounds are compounds that are identified by comparing the analyte mass spectral pattern with the NIST spectral library. A TIC spectral match is reported when the pattern is at least 75% consistent with the published pattern. Compound concentrations are estimated and are calculated using an internal standard response factor of 1.
- PCBs, Total Total PCBs are defined as the sum of detected Aroclors 1016, 1221, 1232, 1248, 1254, 1260, 1262, and 1268.

Certificate of Analysis

Client Name: **LaBella Associates, D.P.C.**
 Client Site I.D.: **Laurel Valley Center Sanitary Landfill (Cupeper)**
 Submitted To: **Jake White**

Date Issued: **4/19/2018 10:17:55AM**

Sample Conditions Checklist

Sample Received at	10:07A
Was your sampler trained?	Yes
Were cooling fans used? If so, were they verified used?	No
Are the cooling fans free of obstructions and working?	Yes
Do all bottle labels agree with custody papers?	Yes
Is the temperature blank or representative sample within acceptable limits? (allows freezing to FID or located on ice and reanalyzed later?)	No
Are all samples within holding time for requested laboratory tests?	Yes
Is a sufficient amount of sample provided to perform the tests included?	Yes
Are all samples in appropriate containers for the analyses requested?	Yes
Were volatile organic containers received?	Yes
Are all volatile organic and TOX containers free of headspace?	Yes
Is a trip blank provided for each VOC sample set? (VOC sample sets include EPA8211, EPA824, EPA8260, EPA824, EPA8215 GR0, EPA8021, EPA824, and R04-175)	Yes
Are all samples received appropriately preserved? (Note that metals containers do not require field preservation but lab preservation may delay analysis)	Yes

See Work Order 18CO114 for TB data. SNL 04 April 2018/1630

Samples were outside of the holding temperature range. Jake White notified via email. DWS 4/9/18 140

Test Notes

The test results listed in this report relate only to the samples submitted to the laboratory and as received by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and turbidity that are performed in the laboratory do not meet NELAP requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the sampler included in the Certificate of Analysis are done so at the client's request and are not included in the laboratory's table of certification nor have they been audited for adherence to a reference method or procedure.

The signature on this final report certifies that these results conform to all applicable NELAP standards unless otherwise specified. For a complete list of the Laboratory's NELAP certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Qualifiers and Definitions

- J The reported result is an estimated value.
- L LCS recovery is outside of established acceptance limits
- M Matrix spike recovery is outside established acceptance limits

- RPD Relative Percent Difference
- Qual Qualifiers
- RE Denotes sample was re-analyzed
- LOD Limit of Detection
- BLND Below Limit of Detection
- LOQ Limit of Quantitation
- SP Spiked Sample
- TC Tentatively Identified Compounds are compounds that are identified by comparing the sample mass spectral pattern with the NIST spectral library. A TC spectral match is reported when the pattern is at least 75% consistent with the published pattern. Compound concentrations are estimated and are calculated using an internal standard response factor of 1.
- PCBs, Total Total PCBs are defined as the sum of detected Aroclors 1248, 1221, 1222, 1246, 1254, 1260, 1242, and 1268.

Sample Conditions Checklist

Sample Receiving Log	Yes
Has each sample labeled?	Yes
Have labels been read? If so, were they entered into?	No
Are the custody papers filled out completely and correctly?	Yes
Do all bottle labels agree with custody papers?	Yes
Is the temperature blank or representative sample within acceptable limits? (above freezing for VOC or recorded on log and recently later?)	Yes
Are all samples within holding time for requested laboratory tests?	Yes
Is a sufficient amount of sample provided to perform the tests included?	Yes
Are all samples in appropriate containers for the analyses requested?	Yes
Were volatile organic containers received?	Yes
Are all volatile organic and TOX containers free of headspace?	Yes
Is a trip blank provided for each VOC sample set? (VOC sample sets include EPA8211, EPA8204, EPA8200, EPA8204, EPA8215 GR0, EPA8021, EPA8204, and R04-175)	Yes
Are all samples received appropriately preserved? (Note that metals containers do not require field preservation but lab preservation may delay analysis)	Yes

For trip blank data, see work order #1802114, DWS 4/4/18 1650

Analysis Detectable Report

Client Name: LaBella Associates, D.P.C.
Client Site ID: Laurel Valley Center Sanitary Landfill (Culpeper)
Submitted To: Jake White

Date Issued: 4/18/2018 4:07:27PM

Laboratory Sample ID: 1858114-01 Client Sample ID: Equipment Blank

Parameter	Sample ID	Reference Method	Sample Results	Qual	LOD	LOQ	Dil. Factor	Units
Thallium	01	82600A	1.30	J	1.00	2.00	1	ug/L

Laboratory Sample ID: 1858114-02 Client Sample ID: Field Blank

Parameter	Sample ID	Reference Method	Sample Results	Qual	LOD	LOQ	Dil. Factor	Units
Toluene	02	SW8260B	0.68	J	0.40	1.00	1	ug/L

Note that this report is not the "Certificate of Analysis". This report only lists the target analytes that displayed concentrations that exceeded the detection limit specified for that analyte. For a complete listing of all analytes requested and the results of the analysis see the "Certificate of Analysis".

Final Report

Laboratory Order ID 1809114

Client Name: LaBella Associates, D.P.C.
1604 Ownby Lane
Richmond, VA 23220

Date Received: April 4, 2018 16:16
Date Issued: April 18, 2018 16:07
Project Number: 2180019.00.01
Purchase Order:

Submitted To: Jake White

Client Site I.D.: Laurel Valley Center Sanitary Landfill (Culpeper)

Enclosed are the results of analyses for samples received by the laboratory on 04/04/2018 16:16. If you have any questions concerning this report, please feel free to contact the laboratory.

Sincerely,

Ted Coyne
Laboratory Manager

End Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as required by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfite that are performed in the laboratory do not meet NELAP requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the Sampler included in the Certificate of Analysis are data as at the client's request and are not included in the laboratory's fields of certification nor have they been audited for adherence to a reference method or procedure.

The signature on the final report certifies that these results conform to all applicable NELAP standards unless otherwise specified. For a complete list of the Laboratory's NELAP certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Qualifiers and Definitions

- C Continuing calibration verification response for this analyte is outside specifications.
- Cl Residual Chlorine or other oxidizing agent was detected in the container used to analyze this sample.
- E Estimated concentration, outside calibration range
- J The reported result is an estimated value.
- L LCS recovery is outside of established acceptance limits
- M Matrix spike recovery is outside established acceptance limits
- P Duplicate analysis does not meet the acceptance criteria for precision
- S Surrogate recovery was outside acceptance criteria

- RPD Relative Percent Difference
- Qual Qualifiers
- RE Denotes sample was re-analyzed
- LOD Limit of Detection
- BLDD Below Limit of Detection
- LOQ Limit of Quantitation
- DF Dilution Factor
- TIC Tentatively Identified Compounds are compounds that are identified by comparing the analyte mass spectral pattern with the NIST spectral library. A TIC spectral match is reported when the pattern is at least 75% consistent with the published pattern. Compound concentrations are estimated and are calculated using an internal standard response factor of 1.

PCBs, Total Total PCBs are defined as the sum of detected Analytes 1016, 1021, 1022, 1048, 1054, 1060, 1062, and 1066.

Sample Conditions Checklist

Sample Received at	11:07PM
Was your sample cooled?	Yes
Was cooling from cold? If so, was the cooled item?	No
Are the custody papers filled out completely and correctly?	Yes
Do all bottle labels agree with custody papers?	Yes
Is the temperature blank or representative sample within acceptable limits? (allows freezing to FID or required on ice and recolded later?)	Yes
Are all samples within holding time for requested laboratory tests?	Yes
Is a sufficient amount of sample provided to perform the tests included?	Yes
Are all samples in appropriate containers for the analyses requested?	Yes
Were volatile organic containers received?	Yes
Are all volatile organic and TOX containers free of headspace?	Yes
Is a trip blank provided for each VOC sample set? VOC sample sets include EPA8211, EPA824, EPA8260, EPA824, EPA8215 GR0, EPA8021, EPA824, and RSG-175.	Yes
Are all samples received appropriately preserved? Note that metals containers do not require field preservation but lab preservation may delay analysis.	Yes

Client Site I.D.: Laurel Valley Sanitary Landfill (Culpeper)

Enclosed are the results of analyses for samples received by the laboratory on 04/04/2018 16:16. If you have any questions concerning this report, please feel free to contact the laboratory.

Sincerely,

Ted Scyars
Laboratory Manager

End Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as required by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfate that are performed in the laboratory do not meet NELAP requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the Sampler included in the Certificate of Analysis are data as at the client's request and are not included in the laboratory's fields of certification nor have they been audited for adherence to a reference method or procedure.

The signature on the final report certifies that these results conform to all applicable NELAP standards unless otherwise specified. For a complete list of the Laboratory's NELAP certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Qualifiers and Definitions

C	Continuing calibration verification response for this analyte is outside specifications.
Cl	Residual Chlorine or other oxidizing agent was detected in the container used to analyze this sample.
E	Estimated concentration, outside calibration range
J	The reported result is an estimated value.
L	LCS recovery is outside of established acceptance limits
M	Matrix spike recovery is outside established acceptance limits
P	Duplicate analysis does not meet the acceptance criteria for precision
S	Surrogate recovery was outside acceptance criteria
RPD	Relative Percent Difference
Qual	Qualifiers
-RE	Denotes sample was re-analyzed
LOD	Limit of Detection
BLOD	Below Limit of Detection
LOQ	Limit of Quantitation
DF	Dilution Factor
TIC	Temporarily Identified Compounds are compounds that are identified by comparing the analyte mass spectral pattern with the NIST spectral library. A TIC spectral match is reported when the pattern is at least 75% consistent with the published pattern. Compound concentrations are estimated and are calculated using an internal standard response factor of 1.
PCBs, Total	Total PCBs are defined as the sum of detected congeners 1016, 1021, 1022, 1048, 1054, 1060, 1062, and 1068.

Date Issued: 4/18/2018 4:05:25PM

Sample Conditions Checklist

Sample Received at	11:07PM
Was your sample cooled?	Yes
Was cooling time met? If no, what was cooling time?	No
Are the correct pumps used on collection and analysis?	Yes
Do all bottle labels agree with custody paper?	Yes
Is the temperature blank or representative sample within acceptable limits? (allows leaching to PVC or leached on ice and resealed later?)	Yes
Are all samples within holding time for requested laboratory tests?	Yes
Is a sufficient amount of sample provided to perform the tests included?	Yes
Are all samples in appropriate containers for the analyses requested?	Yes
Were volatile organic containers received?	Yes
Are all volatile organic and TOX containers free of headspace?	Yes
Is a trip blank provided for each VOC sample set? VOC sample sets include EPA8211, EPA8204, EPA8200, EPA8204, EPA8215 GPO, EPA8021, EPA8204, and RSV-175.	Yes
Are all samples received appropriately preserved? Note that metals containers do not require field preservation but lab preservation may delay analysis.	Yes

For trip blank data, see work order #1803114, DWS 4/6/18 1710

Final Report

Laboratory Order ID 1809114

Client Name: LaBella Associates, D.P.C.
1604 Ownby Lane
Richmond, VA 23220

Date Received: April 4, 2018 16:16
Date Issued: April 18, 2018 16:07
Project Number: 2180019.00.01
Purchase Order:

Submitted To: Jake White

Client Site I.D.: Laurel Valley Center Sanitary Landfill (Culpeper)

Enclosed are the results of analyses for samples received by the laboratory on 04/04/2018 16:16. If you have any questions concerning this report, please feel free to contact the laboratory.

Sincerely,

Ted Scyars
Laboratory Manager

End Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as required by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfite that are performed in the laboratory do not meet NELAP requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the Sampler included in the Certificate of Analysis are data as at the client's request and are not included in the laboratory's fields of certification nor have they been audited for adherence to a reference method or procedure.

The signature on the final report certifies that these results conform to all applicable NELAP standards unless otherwise specified. For a complete list of the Laboratory's NELAP certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Qualifiers and Definitions

C	Continuing calibration verification response for this analyte is outside specifications.
Cl	Residual Chlorine or other oxidizing agent was detected in the container used to analyze this sample.
E	Estimated concentration, outside calibration range
J	The reported result is an estimated value.
L	LCS recovery is outside of established acceptance limits
M	Matrix spike recovery is outside established acceptance limits
P	Duplicate analysis does not meet the acceptance criteria for precision
S	Surrogate recovery was outside acceptance criteria
RPD	Relative Percent Difference
Qual	Qualifiers
-RE	Denotes sample was re-analyzed
LOD	Limit of Detection
BLOD	Below Limit of Detection
LOQ	Limit of Quantitation
DF	Dilution Factor
TIC	Temporarily Identified Compounds are compounds that are identified by comparing the analyte mass spectral pattern with the NIST spectral library. A TIC spectral match is reported when the pattern is at least 75% consistent with the published pattern. Compound concentrations are estimated and are calculated using an internal standard response factor of 1.
PCBs, Total	Total PCBs are defined as the sum of detected congeners 1016, 1021, 1022, 1048, 1054, 1060, 1062, and 1068.

Sample Conditions Checklist

Sample Received at	11:07PM
Was your sample cooled?	Yes
Was cooling from cold? If so, was the cooled item?	No
Are the custody papers filled out completely and correctly?	Yes
Do all bottle labels agree with custody papers?	Yes
Is the temperature blank or representative sample within acceptable limits? (above freezing to 7°C or cooled to 4°C and stored later?)	Yes
Are all samples within holding time for requested laboratory tests?	Yes
Is a sufficient amount of sample provided to perform the tests included?	Yes
Are all samples in appropriate containers for the analyses requested?	Yes
Were volatile organic containers received?	Yes
Are all volatile organic and TOX containers free of headspace?	Yes
Is a trip blank provided for each VOC sample set? (VOC sample sets include EPA8211, EPA824, EPA8260, EPA824, EPA8215 GRO, EPA8021, EPA824, and RSG-175)	Yes
Are all samples received appropriately preserved? (Note that metals containers do not require field preservation but lab preservation may delay analysis)	Yes

Enclosed are the results of analyses for samples received by the laboratory on 04/04/2018 16:16. If you have any questions concerning this report, please feel free to contact the laboratory.

Sincerely,

Ted Scyars
Laboratory Manager

End Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as required by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfate that are performed in the laboratory do not meet NELAP requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the Sampler included in the Certificate of Analysis are data as at the client's request and are not included in the laboratory's fields of certification nor have they been audited for adherence to a reference method or procedure.

The signature on the final report certifies that these results conform to all applicable NELAP standards unless otherwise specified. For a complete list of the Laboratory's NELAP certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.

Qualifiers and Definitions

C	Continuing calibration verification response for this analyte is outside specifications.
Cl	Residual Chlorine or other oxidizing agent was detected in the container used to analyze this sample.
E	Estimated concentration, outside calibration range
J	The reported result is an estimated value.
L	LCS recovery is outside of established acceptance limits
M	Matrix spike recovery is outside established acceptance limits
P	Duplicate analysis does not meet the acceptance criteria for precision
S	Surrogate recovery was outside acceptance criteria
RPD	Relative Percent Difference
Qual	Qualifiers
-RE	Denotes sample was re-analyzed
LOD	Limit of Detection
BLOD	Below Limit of Detection
LOQ	Limit of Quantitation
DF	Dilution Factor
TIC	tentatively identified compounds are compounds that are identified by comparing the analyte mass spectral pattern with the NIST spectral library. A TIC spectral match is reported when the pattern is at least 75% consistent with the published pattern. Compound concentrations are estimated and are calculated using an internal standard response factor of 1.
PCBs, Total	Total PCBs are defined as the sum of detected congeners 101B, 1021, 1030, 1040, 1054, 1060, 1062, and 1068.

Client Site I.D.: Laurel Valley Sanitary Landfill (Culpeper)
Submitted To: Jake White

Date Issued: 4/18/2018 4:05:25PM

Sample Conditions Checklist

Sample Received at	11:07PM
Was your sample cooled?	Yes
Was cooling time met? If no, what was cooling time?	No
Are the sample pieces free of containers and contents?	Yes
Do all bottle labels agree with custody papers?	Yes
Is the temperature blank or representative sample within acceptable limits? (allows freezing to FOC or residual oil to be and identify later?)	Yes
Are all samples within holding time for requested laboratory tests?	Yes
Is a sufficient amount of sample provided to perform the tests included?	Yes
Are all samples in appropriate containers for the analyses requested?	Yes
Were volatile organic containers received?	Yes
Are all volatile organic and TOX containers free of headspace?	Yes
Is a trip blank provided for each VOC sample set? VOC sample sets include EPA8011, EPA804, EPA806, EPA804, EPA815 GR0, EPA8021, EPA804, and R04-175.	Yes
Are all samples received appropriately preserved? Note that metals containers do not require field preservation but lab preservation may delay analysis.	Yes

For trip blank data, see work order #1802114, DWS 4/6/18 1710

Client Site I.D.: Laurel Valley Center Sanitary Landfill

Enclosed are the results of analyses for samples received by the laboratory on 09/27/2018 15:20. If you have any questions concerning this report, please feel free to contact the laboratory.

Sincerely,

Ted Coyne
Laboratory Manager

End Notes:

The test results listed in this report relate only to the samples submitted to the laboratory and as required by the Laboratory.

Unless otherwise noted, the test results for solid materials are calculated on a wet weight basis. Analyses for pH, dissolved oxygen, temperature, residual chlorine and sulfate that are performed in the laboratory do not meet NELAP requirements due to extremely short holding times. These analyses should be performed in the field. The results of field analyses performed by the Sampler included in the Certificate of Analysis are data as at the client's request and are not included in the laboratory's fields of certification nor have they been audited for adherence to a reference method or procedure.

The signature on the final report certifies that these results conform to all applicable NELAP standards unless otherwise specified. For a complete list of the Laboratory's NELAP certified parameters please contact customer service.

This report shall not be reproduced except in full without the expressed and written approval of an authorized representative of Air Water & Soil Laboratories, Inc.
